EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

Comment on Submissions

1. The action is responsive to submissions filed 5 September 2003.

Allowable Subject Matter

2. Claims 1-31 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter: Regarding independent claims 1, 8, 18, and 25, the prior art does not disclose or fairly suggest X-ray detection methods or apparatus including at least an X-ray conversion (i.e., scintillator) step or means and a photodiode sensing step or means and further including a nonlinearly absorbing filter step or means.

The examiner notes that while radiation detectors including a light absorber are known in the art (see for example Kuwabara – US 2001/0038076 A) are known in the art, the prior art does not fairly suggests the use of a nonlinear absorbing filter in such detectors. The examiner additionally notes that while it is known in the visible imaging art to use a nonlinear (i.e., phototropic) filter (see for example Ogawa – US 4,577,098 A), it is not apparent, absent hindsight reasoning, that there would have been any motivation to combine the two teachings to arrive at the present invention.

4. The remaining claims are allowed on the basis of their dependency.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
